ROUGH TERRAIN CARRIER

Built with a rigid frame that provides for more stability than articulated carriers, the Barko Rough Terrain Carrier offers an exceptional combination of maneuverability and productivity. Offering three steering modes and impressive drawbar pull, this self-propelled unit gets your loader around the yard quickly to save time and money.

MORE STANDARD FEATURES

- 54,000-lb capacity outboard planetary axles
- Front and rear steering
- 16x25, 26-ply single lug tires or Setco solid tires
- 4-wheel hydraulic service brakes
- Spring applied, hydraulic release park brake
- Steel line along inside of frame
- 3/4" hitch plate for pintle hitch mount

FEATURES

2-speed hydrostatic drive transmission allows carrier to travel 3.4 mph in low gear and 12 mph in high gear.

Delivers an incredible **25,000 pounds of tractive effort**, allowing it to move around easily on rough terrain areas of the yard.

Hydraulic steering with 4-wheel, 2-wheel and crab steering capabilities allow for effective maneuvering in tight spaces.

Carrier is epoxy primed and painted black to provide a durable, professional finish.
